 261 Records relating to individuals nominated by the governor to fill various positions. These nominees were not acted on by the Committee before the end of the session.
 270 Records include a Senate Executive Committee Report which provides only the General Assembly number, name of nominee, and date referred. A nomination letter from the governor to the Senate shows the name and address of the nominee, position to be appointed to, length of term, and signature of the governor. The nominee's resume is also attached. When nominees are not approved by the end of any General Assembly, the nomination process must start over in the next General Assembly.
