261 These photos were used by the Department for informational purposes and for use in monitoring the natural resources of Delaware, especially the wetlands, waterways, and coastal areas.  
270 There is one state-wide survey for 1960-1962. There are only selected photos from the remaining surveys: 1954, 1968, 1975, and 1977. These photos are concentrated along the Delaware River, Delaware Bay, and Atlantic Ocean coastal areas; but also document the dams on the Brandywine River, no date; the Woodland Beach Wildlife Area, ca. 1989; James Branch estuary, 1972, no date; and the Chesapeake and Delaware Canal, 1977. Also included are the 1974 and 1980 editions of the "Real Estate Atlas of New Castle County." This publication includes copies of aerial photos and maps for all sections of the county. The 2012 color aerial photograph/map is for Killens Pond State Park, Murderkill River Nature Preserve and Fork Branch Nature Preserve. It notes the names of roads, developments, water bodies, wildlife tracts, schools, and park features such as recreational areas and trails. Frederica, part of Dover, and part of Felton are included on the map.
