261 Informational materials sent to individuals involved with civil defense activities in Delaware.  
270 Types of records included regulations, memorandums, operational instructions, minutes, annual report, director's reports and other informational circulars. General regulations relate to identification cards, attack warning system, loyalty oaths, instructions for motorists in an actual or a practice air raid, vehicle identification plates, and donation of federal surplus property. The memorandums accompany revisions to the state civil defense plan. The operations letters provide procedures for reporting and handling downed hostile aircraft, duties of liaison agents, military advisors, re-assignment of the Civil Aviation Division, de-activation of mobile support groups, training courses, memorandum of understanding between the Post Office Department and the Federal Civil Defense Administration, and rationing of solid fuels during periods of emergency. Also included are lists of available surplus property and a small poster with air raid instructions. The 1962-1963 materials were all contained in a mailer sent to a Civil Defense Advisory Council member of the New Castle County office.
