261 Planning studies, reports, and other records relating to the
administration of City of Newark's water and wastewater infrastructure.
270 The water use reports (2001-2008) are made to the Department of Natural
Resources, Division of Water Resources. They show the number of gallons
self-supplied for each month, amount purchased, source of the water, the
total amount of gallons billed, total population served, number of
service connections, total annual demand by residential, communities,
institutions, and industry, and signature of the respondent. Also
present are reports for each of the city water sources showing the
location of the well or stream, type of use, status, gallons pumped each
month, and totals. Also present in the box are water pressure charts and
maps, sanitary sewer design flow tables, and a review of the
Comprehensive Development Plan IV.

The planning studies and reports relate to the water pump station
(2002), reservoir and construction (2002, 2004), National Pollutant
Discharge Elimination System (NPDES) storm water permit applications
(2008-2012), storm water renewal application (2008-2012), and NPDES
storm water annual reports (2003-2008).
