 240 2.52 cubic feet
 241 2 cfb.
 261 Files created as part of the process to settle disputed Kent County school district boundary lines.
 270 In the 1970s Kent County established school district lines that were in conflict with the Mowrey lines authorized by the Delaware Code. The discrepancy was discovered using GPS survey data for school districts in the State. In an effort to rectify the discrepancy, legislation creates a window for school districts with boundaries in Kent County to review the County and the Mowrey lines, consult with adjoining district(s) and arrive at a common boundary line using tax parcel data. It further allowed the State Board of Education to affirm the local district actions using public processes of notification and public hearings. The districts had until January 1, 2008, to exercise the process.

The files may include requests to the Board from respective school district boards, Board decisions, correspondence, exhibits, hearing rules, public advertisements, and transcripts. They relate to the Caesar Rodney, Milford, Lake Forest, Woodbridge, Capital, and Smyrna school districts.
