261 Records of projects to remove or contain asbestos in District schools and buildings.
270 The records in this series are primarily Air Monitoring and Project Management reports submitted to the Christiana School District by BATT Environmental. These records include training certificates, standard forms of agreement, waste shipment records, certification of completed work, invoices, correspondence with Facilities Management, floor plans and Board of Education memos. Additionally, this series includes files of Specifications for Repair of Damaged Asbestos Containing Materials, summer renovation plans, National Emission Standards for Hazardous Air Pollutants (NESHAP) surveys, project bids and proposals.

Records in this series are marked with record type and school but are not arranged in any apparent order.
