261 A series of 1420 aerial view color slides documenting the state in 1970.
27X The survey started near the northern boundary at Naamans Road, went south along the coastline including the eastern portion of the state, went west along the southern boundary and then north along the western part of the state to the arc. In addition to the coastline, major subjects include the Christina River from its source to the Delaware River, Cherry Island, Wilmington Marine Terminal, Fort Delaware, Chesapeake and Delaware Canal, Artificial Island, lighthouses, Getty Refinery, Appoquinimink River, Mispillion River, Broadkill River, Lewes and Rehoboth Canal, Indian River, Cypress Swamp, Nanticoke River, and the northern arc boundary.

Cities and towns represented include Claymont, Wilmington, Newport, New Castle, Deemers Beach, Delaware City, St. Georges, Chesapeake City, Port Penn, Augustine Beach, Middletown, Odessa, Smyrna, Dover, Woodland Beach, Bowers Beach, Milford, Slaughter Beach, Milton, Lewes, Rehoboth Beach, Dewey Beach, Oak Orchard, Millsboro, Bethany Beach, Fenwick Island, Selbyville, Georgetown, Delmar, Laurel, Seaford, Marydel, and Newark.

The last tray contains views of lighthouses and other features in the Delaware River and Bay. Slides were taken from a helicopter and airplanes by Lloyd Teitsworth and Dee Andrews.

WORK STATUS	ARCHIVIST:
___ needs sorting	___ review for identification/ further determination
___ needs unfolding	___ processing
___ needs foldering/reboxing	___ determine origin/purpose
___ other: _____	___ other:
CONDITION:	FILM:
___ totally disorganized	___ for security
___ order not apparent	___ destroy original
___ origin questionable	___ other:
___ other: _____	

330 Arranged numerically by tray number and then by slide number.
331 No index.
332
350 Scanned images available.
360
390 Photograph database and paper checklist.
420 Gift of Mr. and Mrs. Ellice McDonald, Jr. Invergarry, Montchanin, DE.
430 Leon de Valinger suggested the project and Mrs. McDonald saw that it was completed. The collection was in 18 slide carousels. The foam in the acidic boxes was disintegrating, so the slides were removed and placed in the slide cabinet when they were scanned. Scanned by volunteer Alex Funderburk, 2012.
