261 Records relating to what the donor believes to be the first modern-day windmill installed in Delaware. It was built by Barbara and Al Erskine near Glasgow.
270 Records include a daily wind speed and direction record book compiled prior to windmill installation, 1982-1983; correspondence with Delmarva Power relating to rate charges and with parts suppliers, 1989; a copy of *Home Wind Power* by the United States Department of Energy, 1981; and a copy of a 1985 *News Journal* article about the windmill. Additional windmill records present are the installation and operation manual, maintenance procedures, schematics, and receipts, 1980-1989, and a manual for the digital wind speed and direction indicator, 1982. A typed history of their efforts to install the windmill is also included.
